

Regular internal meetings of PhDs and Postdocs in CQOM affiliated groups

Meeting structure

Friday @ 3 PM every even week starting from January 12th

15 min
Talk (E) 

15 min
Discussion 

15 min
Talk (T) 

15 min
Discussion 

4 PM: ongoing discussion can adiabatically transfer to Friday bar

NOTE: 3 PM - 4 PM discussion is supported by coffee, tea and cake!

Talk structure

Not another seminar!
More like structured discussion in a bar.

Start with a question

Not with a title!

5 min
Why? Why is this important for **us**? Why do **you** find it interesting? Do spend 5 min discussing this and giving context.

5 min
What? Introduce all necessary elements: experiment, Hamiltonian etc. This is what you **reused** from other people/literature. This is known to experts in your field - explain fundamentals.

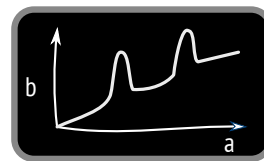

5 min
How? How do you use these elements? This is about what is **new/original** in your approach. Focus on methodology more than on final results as the former is more transferable to wider audience.

End with a question

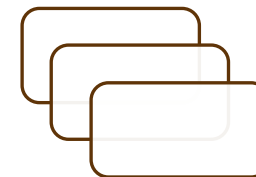

Not with a conclusion!

Technology to support the talk

unlimited blackboard

and

up to 3 slides with a single figure (think about old-style transparencies; No lists!)

- Minimalism in resources to
- (i) focus talk on main points;
 - (ii) make talk simpler to digest;
 - (iii) reduce an order of magnitude preparation time.
